**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, drawn to a method to increase the number of nucleotide sequence corresponding to the mRNA present in the sample via RT-PCR.

Group II, claim(s) 15-32, 45-110 and 138, drawn to a method to increase the number of nucleotide sequence corresponding to the mRNA present in the sample involving restriction enzyme.

Group III, claim(s) 33-44 and 111-135, drawn to a heeler primer and the kit containing the primer.

Group IV, claim(s) 136, drawn to a method to increase the number of nucleotide sequence corresponding to the mRNA present in a low quantity in a sample involving the step of increasing the proportion of high molecular weight DNA molecule.

Art Unit: 1637

Group V, claim(s) 137, drawn to a method to increase the number of nucleotide sequence corresponding to the mRNA present in a low quantity in a sample involving the step of cutting any large DNA molecules and increasing the amount of long double strand products with sequences more 5' from the original mRNA.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I-II and IV-V are method groups in which each group involves different method steps as indicated in the statement set forth above. Group II is a product group, which is drawn to a heeled primer and the kit containing the primer in that the primer was anticipated by the teachings of Freeman et al. (WO 00/08208, See pg. 13 and 26, and fig. 1).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
